BROCHURE

*The ages between birth and age five are the foundation upon which successful lives are built.*

We at 'Future Tots' educate for sustainability, through community-integrated, entrepreneurial learning, Our holistic, student-guided approach inspires and empowers us.

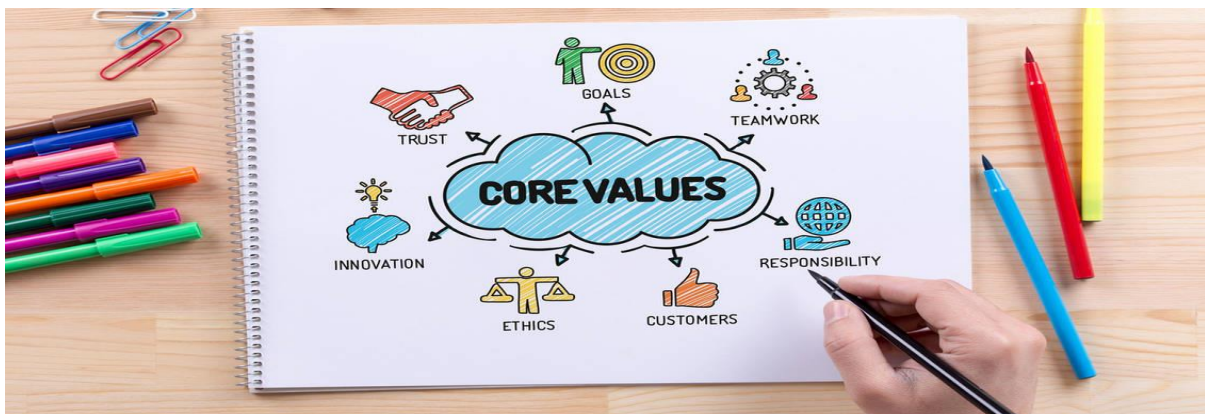

## The Mission in Action-

The world our children will inherit is changing faster than at any other time in history. For our children to prosper and humankind to flourish, we need a new kind of education, one that fosters 21st Century skills.

### CORE VALUES

we focus on the core values of Integrity, Responsibility, Equity, Sustainability, Peace, Empathy, Community, and Trust.

At all times we teach and model these values and support our students in doing the same. We encourage all teachers to honour and recognize these values in our students at all times with on-going dialogue, discussions, and reinforcement.

**Learning Principles** The Learning Principles are core shared beliefs about how to provide powerful and impactful learning experiences. They guide our educational practice across all our learning program.

### **Our Learning Program**

It is committed to a natural, holistic, student-centered learning experience that empowers and inspires our students to be creative, innovative, change-makers. The holistic learning at 'Future Tots' focuses on the physical, emotional, intellectual and expressive development of the child.

Early Years program offers a child-centric education .The play-based program sparks children's natural curiosity and in-stills the joy of learning through singing, dancing, art, storytelling, cultural celebrations, yoga and mindfulness, green studies, and excursions around .This is interspersed with a gentle integration of proficiencies such as numbers and letters in a very holistic, play-based way. There is a large emphasis in our Early Years program on in-stilling values of kindness, love and mutual respect for each other and our planet.

With five E's of Education.

Education**

## **Our Pedagogy**

The program for all classes, is built around five major areas of learning :

1. Physical Development (Gross Motor and Fine Motor)
2. Social Emotional
3. Language Development
4. Cognitive
5. Creative Expression

We have structured our teaching programme to emphasise self-learning through exploration.

## **Our facilitators**

We have well trained, Experienced, Passionate, Patient and Empathetic facilitators who know exactly when and how to gently & appropriately guide/instruct/ help a child while he/she is exploring their environment and learning abilities. Our pedagogy is derived from various philosophies, taking the best that each has to offer, while making sure that the child is at the center of it all.

All concepts are introduced in the form of activities with further presentations left at the child's discretion to respect, practice, and consolidate the outcome on his/her own, with teacher being the pillar in guiding them to achieve a meaningful learning outcome.

## **ADMISSION**

Our preschool includes Tots, Nursery, and Kindergarten (K1 and K2) for kids of different age groups.

## **TRANSPORTATION**

The need for safe passage for children to commute to school is of prime importance to us. Which is why all our school vans are equipped with Real-time GPS tracking, speed governors, and are manned by trained drivers. To ensure additional safety, our school children are accompanied by a female staff at all times during transportation.

## **SAFETY & SECURITY**

We take the utmost care when it comes to safety and the security of our children. The entire Campus, including the classrooms, are under 24/7 CCTV surveillance. We perform thorough Background checks on all of our staff and follow strict safety measures. In addition to the above, we also maintain a close relationship with all nearby Paediatric centres in case of any mishap or accident.
